# STOP IMPAIRED DRIVING CONFERENCE

Focusing America's experts & resources to  
address multiple substance impaired driving

# WELCOME

Welcome to the National Alliance to Stop Impaired Driving (NASID) Conference! We are truly honored by your interest and attendance, either in person or via our online platform, as we embark on a bold and exciting new initiative to prioritize multiple substance impaired driving.

Responsibility.org, funded by America's leading distillers to lead the fight to eliminate underage drinking, eliminate drunk driving and work with others to end all forms of impaired driving, and promote alcohol responsibility, has long acknowledged that multiple substance impaired driving is one of the leading causes of traffic fatalities, requiring leadership and vision for change. NASID is that change, founded by Responsibility.org, organizing the nation's foremost experts and key partners to address multiple substance impaired driving to save lives.

This conference aims to highlight the most challenging and critical areas to address multiple substance impairment to help NASID formulate a national strategic framework addressing policy, training, detection, technology, data systems, education, toxicology, adjudication, and remediation. We welcome your insights and engagement. Thank you for joining us and for your support.
